FLEX-GATE® SIDE DEPLOY (FGSD) VERSATILE FABRIC FLOOD PROTECTION THAT DEPLOYS IN MINUTES

The Flex-Gate® Side Deploy is a high-strength fabric wall that can be deployed rapidly for flood protection around and between buildings, across doors of any size or across window walls. The patented system can be scaled to withstand any water height and can be easily deployed or stowed by a single person within minutes, even in high winds. It is stored in a container at the point-of-use so that all materials and components are available when needed, and sealed to the ground by either integral weights or clamp bars.

Flex-Gate Side Deploy Benefits

- **Point-of-use Storage** – Deploys at the last moment for minimal operational disruption
- **Rapid Deployment** – Deploys in 5 to 10 minutes (weighted skirt) or 15 to 20 minutes (clamped skirt) by one or two people
- **Compact Stowage** – Stores in small spaces
- **Scalable Design** – Can be sized to fit any vertical opening
- **Robust Materials And Construction** – Withstands debris impacts (with optional debris netting)
- **Prevents Flooding** – Seepage is less than 0.5 gal/min/ft of perimeter
