EZDAM® XL FLOOD BARRIERS (EZD-XL)

FAST FLOOD PROTECTION FOR LARGER OPENINGS

EzDam® XL is the big brother to our easy-to-use, lift-out EzDam®. It is a flood protection option that is ideal for larger openings like double doors, retaining walls, storefronts and driveways. This barrier deploys in just minutes. Just latch the barrier to the jambs in front of your opening before floodwaters arrive. When not in use, the EzDam XL is stored away from your opening. When flooding happens, you need protection that is reliable and easy to implement, and this barrier is a great alternative to cumbersome sandbags.

EzDam® XL Benefits

- **Quick and easy to install** – Deployment requires only one person and can be done in just minutes.
- **Great alternative to sandbags** – It's an easy, lift-out option for flood protection.
- **Easy to store** – Does not require storage at door opening.
- **Customizable** – Available in 48" height and 53"-120" max opening width, but any custom size can be created and made to fit any size door or opening.
- **Easy to maintain** – Seals the opening utilizing only bottom and side gaskets, making this lift-out barrier easy to maintain.
